light produced interference, delayed matching-to-sample task, capuchin monkeys, 4006

light unilateral visual deprivation due to lid-suturing, retina, rats,

light, cell responses in superficial gray & optic layers of superior colliculus, rhesus monkeys, 6138

low-interference & low-heat build-up & direct-current fluorescent lighting system, noise interference reduction in psychophysiologic experimental chambers, 6155

luminance & duration of interstimulus interval, human reaction time, 10352

luminance & intervening stimulus pattern contours & interstimulus interval, form identification & visual integration & differentiation processes, authors & undergraduates & graduate psychology students, 1613

luminance level, wavelength generalization & discrimination, pigeons, 6350

magnitude & duration of stimulus change, light-contingent bar

pressing, rats, 543 masking stimulus duration & dark interval, detection thresholds for

disk of light, college & high school students, 8292 monocular vs. binocular judgments with varying luminance-duration parameters to each eye, detection rates, 8346

monocular vs. binocular viewing, lightness & object embeddedness in background, 3569

old & new & future car headlight systems, effectiveness in night driving, 3442

patterned flashes, alpha attenuation & pattern discrimination, 1805 peripheral stimulus eccentricity & illumination level & light adaptation, visual angle & apparent size & distance perception, male undergraduates, 3607

photic frequency & pulse-to-cycle fraction & blood oxygen level, perceived duration, 3568

photostimulation of 6th abdominal ganglion, information theoretical analysis of aversive walk response, crayfish, 396

prior light vs. dark exposure, imprinting process, domestic chicks, 6344

progressive retinal destruction, illumination level & age difference effects on open-field activity & brightness discrimination ability, young mice, 1916

quiet & relaxation & activation of autoregulative intervention & mental arithmetic, evoked EEG responses to light stimuli, 8503 regular vs. random intermittent reinforcement, successive brightness

discrimination, rats, 6372

reinforcement by cessation of flickering light & duration of time-out from flicker, bar pressing & application of generalized discrepancy model, rats, 503

reinforcement of key releases whose latencies from light fell within payoff band, temporal contingency effects on key release RTs, monkeys, 544

response key illumination, airflow velocity discrimination acquisition & stimulus control, pigeons, 4075

responsive-contingent sensory change in bar pressing, preference for ambient light intensity & sound, rats, 6377

retinal separation between test & inducing fields & inducing luminance & inducing area, threshold of test field, college & graduate students, 8337

search area size, target acquisition with passive night vision devices, operators, 5598

septal lesions, home cage lighting effects on drinking behavior, rats, 3904

shifts from light-dark cycle to constant illumination, water-intake rate in daytime, mice, 529

signal detectability & luminance, temporal discrimination of 2-pulse visual stimuli, 138

simple light stimuli vs. complex sound stimuli, habituation of palmar surface skin potential reflex, monkeys, 6212

spatial-contrast-transfer function, light-adapted retina, 1643 steady & intermittent illumination, border enhancement, 8326

stimulus luminance, hue discrimination, practiced emmetropic color-normal Ss, 3621

stimulus-light color presentation against different background colors & dim vs. bright illumination, detection speed & recognition of signal lights, college students, 1638

synthetic rat scotophobin intracranial injections, light vs. dark avoidance learning, goldfish, 6233

vibratory & light-flash stimulation, habituation & dishabituation of

evoked responses, garter snakes, 6088 wakefulness & synchronized sleep & steady photic stimulation, tonic response of central visual path neurons, midpontine- pretrigeminal cats, 368
